

BBAA Virtual Summer Camp
Monday, August 10th
Craft Day

Flying Saucer Craft

Supplies Needed:

- Construction Paper
- Popsicle Sticks
- Scissors
- Glue
- Rulers
- Pencil
- Googly Eye
- Alien craft template
-

Step 1: Cut out the pieces for the spaceship using the template

Step 2: Glue the protractor shape with the long oval shape. This will create the base for our spaceship

Step 3: Glue the bigger circular pieces on the bottom part of the spaceship

Step 4: Glue the smaller circular pieces on the middle of the bigger circles from the previous step

Step 5: Take the two long paper strips and glue tiny round pieces on one end of the strips

Step 6: Glue both of the strips slightly diagonally on the back of the spaceship

Step 7: Take the pieces for the alien. Fold your paper strip into a "V" shape then glue the alien on the top part of the spaceship

Step 8: Take your googly eye and glue it to your alien. If you do not have any googly eyes, then you can draw your own on!

Step 9: Finally, take your popsicle stick and glue it to the back of your spaceship so it can fly!!
